

IMS102/IMS202 Information Management System

Last Modified on 11/05/2021 1:35 pm EDT

The Information Management System (IMS) runs the IMS service that sequences the Air Data Routers (ADR) to route the air packets from individual test areas to the Sensor Suite (SST) where it is sampled and measurements recorded. Data from the ADR and SST is uploaded to the IMS. With a BACnet® interface, the IMS also serves as the integration hub for data from the Building Automation System (BAS) and any independent ventilation control system. This data is incorporated in the desired room-level control strategy, and collected, merged with ADR and SST data, and uploaded to MyAircuity.com.
