Celebrating 20 Years of Creating Measurably Better Environments for Clients

Last Modified on 04/03/2020 5:02 pm EDT

Aircuity is the 20-year industry leader in healthy indoor environments and energy efficiency. Our patented, multiplexed demand control ventilation platform continuously optimizes ventilation rates and provides intelligent data to a wide variety of constituents.

Today, Aircuity is installed in more than 100 million square feet across 17 countries. Equally as extraordinary is the impact that the company is having on the environment. To date, Aircuity has sequestered 9.2 billion lbs. of CO2; the same amount saved by 5.4 million acres of forest – roughly the size of New Jersey!

"We want to give special thanks to all our current and past employees, our partners and owners who have made this possible, through steadfast belief and the desire to improve the planet and the indoor environment. "Everyone at Aircuity is excited to begin our next 20 years." - Dan Diehl, CEO of Aircuity.
