

Healthy Buildings Brochure: Commercial Office

Last Modified on 07/17/2020 11:22 am EDT

Learn Strategies for Achieving and Maintaining a Healthy Building

With over 20 years of expertise in air quality, Aircuity's platform measures, manages, and communicates the IAQ in buildings. Knowing what's in the air, allows us to make changes in the air. Since airflow is constant, the quality is also ever-changing, installing Aircuity's IAQ platform provides a view into the scientific make-up of the air we breathe so we can provide the right airflow at the right time in the right space. We can all make plans for how to manage building airflow in the ideal world, what we need is a plan that can adjust to the realities we face on a day-to-day basis.
