

Air Quality as a Service

Last Modified on 01/31/2022 9:51 am EST

Optimizing air quality; achieving sustainability goals; addressing deferred maintenance

Aircuity approaches each AQaaS engagement by working with clients to prioritize their portfolio for IAQ improvement and identifying each organization's largest operational and energy savings potentials. In many cases, untapped savings opportunities exist in critical environments and other highly variable occupancy spaces, that can easily help fund such air quality improvements to create a positive cashflow implementation and a true "win-win-win".

- **Owners:** see dramatically improved air quality and lower operating costs;
- **Occupiers:** get a platform and understanding of better air quality; and
- **Operators:** get a life cycle platform approach to managing and maintaining air quality over the life of the facilities

Achieve the most impactful energy efficiency measure with Aircuity. [Contact us \(http://www.aircuity.com/about-us/sales-channel/\)](http://www.aircuity.com/about-us/sales-channel/) today!
